

European Performance Labs is excited to announce the release of our new **Cayman S Race Headers**. Countless hours of testing primary runner size and collector designs have allowed us to create a header that produces substantial gains throughout the entire RPM range. Special care was taken to produce a tuned header that eliminates the torque dip found in the OEM manifolds and many aftermarket headers. Significant gains can be seen throughout the entire power band; as high as **19WHP** and **19WTQ** over stock, and as much as **13WHP** and **21WTQ** over the competition in some areas. In addition, **EPL's Cayman S Race Headers** dramatically change the sound of your exhaust.

The **Cayman S Race Headers** are available separately (\$2099), or as part of **EPL's Stage II Cayman S Upgrade** (\$2549) with a flash.

For more information, please contact sales@eplabs.net or call **203.345.6499**.
